

**Appendix A: Historical and Archaeological Properties
Draft Impact Analysis**

Historical and Archaeological Properties (Section 106 Properties)

Sterling Highway, Milepost 45-60

Tables A-1 and A-2 present a list of historical and archaeological properties that are potentially impacted by the Sterling Highway alternatives. Please note that the Russian River Alternative is not included in the tables, as a complete survey has not been conducted for this alignment. Under the Russian River Alternative, the adverse impacts to historical and archaeological properties is potentially extensive. The density of archaeological sites in areas adjacent to the Russian River Alternative indicates that there is likely a wealth of archaeological material in the path of the bypass. Extensive cultural surveys would be required along the entire proposed ROW for a listing.

**Table A-1
Historical Properties Potentially Impacted**

Historical Property	Kenai River Wall Alt.	Kenai River Alt.	Cooper Creek Alt.	“G” Alts.	Juneau Creek “F” Forest Alt.	Juneau Creek “F” Wild. Alt.	Juneau Creek Forest Alt.	Juneau Creek Wild. Alt.
